ACKNOWLEDGMENT

It gives me great pleasure to thank Dr. M.R. Raghavendra Rao, Chairman, Discipline of Biochemistry & Applied Nutrition, Central Food Technological Research Institute, Mysore, for his invaluable guidance and constant help and encouragement during the course of this work.

I appreciate the help and cooperation of my colleagues of this Institute and especially of the Discipline of Biochemistry and Applied Nutrition.

I thank the authorities of the Indian Institute of Science, Bangalore and in particular, Dr. T. Ramakrishnan (of the Microbiology and Pharmacology Laboratory) for allowing me to make use of their radioactivity counter.

I also thank the Director, Central Food Technological Research Institute, Mysore, for the award of a Junior Research Fellowship, during the early part of this investigation and for providing the necessary facilities. I am grateful to him for allowing me to submit the results of the work done during the period of Fellowship, in the form of a thesis for Ph.D. Degree.

The award of a Senior Research Fellowship by the Director-General, CSIR, New Delhi, during the tenure of which, the present work was completed, is gratefully acknowledged.

M. S. Shailaja  
(M.S. SHAILAJA)
