Dean, Post-graduate Studies.

### ACKNOWLEDGEMENT

It is my profound privilege to express my deep sense of gratitude and heartfelt thanks to my Major Advisor Dr.M.L. Sharma, Professor and Head, Department of Sociology for his guidance, constructive criticism, timely legitimization, constant stimulation and encouragement extended throughout my Master's and Doctoral Programme, without which this work would have not come to the present shape. His scholarly suggestions, prudent admonitions, immense interest and affectionate behaviour have been a fountain of great inspiration for me. However, I feel that words of wisdom of Dr.Sharma and his affectionate concern are not merely to be expressed in words of thanks but something to be cherished in one's life time. His fatherly affection and counsel will remain as a becken light throughout my life.

I express my sincere and heartfelt thanks to Dr.Raj Singh, Assistant Professor, Department of Sociology, whose constructive suggestions were a great source of strength in improving the quality of the study.

I owe a debt of gratitude to Dr.K.Munir, Professor and Head, Department of Extension Education for his stimulating guidance during the study. I also express my sincere thanks to Dr.O.P. Srivastva, Dean, College of Basic Sciences and Humanities, Dr.A.C.Gangwar, Professor and Head, Department of Agricultural Economics and Dr.I.J.Singh, the then Professor and Head, Department of Agricultural Economics for their healthy suggestions in the course of investigations.

I am also thankful to Dr. T.M.Dak, Rural Sociologist for his guidance, whenever called for during the study. Thanks are also due to late Dr.G.S.Sisodia, for helping in the selection of the problem.

I wish to make a special mention of the ever-willing source of help and cooperation of my friend Miss Swarna Mehra, I feel that the words would hardly convey my feelings of gratitude, love and affection I have for her.

I am grateful to Dr.R.K.Punia, Assistant Professor, Miss Salillesh Darshan, Assistant Rural Sociologist and Mrs. Deep Punia, Assistant Scientist, Department of Sociology for the assistance extended during the study.

I feel it a pleasure task to thank my brother S.Harjeet Singh and my younger sister, Miss Satnam Kaur for their co-operation from time to time during the study.

Sincere and heartfelt thanks are also due to Mr.Dalwan Singh Bishar, B.D.O., Dadri, Mrs. Ajita Bhakhar and Mr. H.L. Murari, B.D.O., Mithheri, without their timely help and co-operation, it was difficult for me to complete the work in time.

I acknowledge the financial Assistance extended by Council for Scientific and Industrial Research, New Delhi in the form of fellowship. I also acknowledge the services of I.A.S.R.I., New Delhi for the computerization of data. Thanks are due to Sh. R.N.Saini for taking pains in typing of thesis. Thanks are also due to respondents for their cooperation.

Mallik Kaur

## LIST OF TABLES

Table No.	Description	Page
1.	Contextual characteristics of the respondents.	76
1.1.	Distribution of the respondents as per age.	76
1.2	Distribution of the respondents as per educational level.	77
1.3	Distribution of Respondents as per size of landholdings.	77
1.4	Distribution of respondents as per occupation.	77
1.5	Distribution of respondents as per income level.	78
1.6	Distribution of respondents as per family type.	78
1.7	Distribution of respondents as per family size.	78
1.8	Distribution of respondents as per caste.	79
1.9	Distribution of respondents as per socio-economic status.	79
1.10	Distribution of respondents as per social participation.	79
1.11	Distribution of respondents as per level of exposure.	80
2	Level of use of improved agricultural practices in different regions.	89
3.	Level of agricultural mechanization as per region.	91
4.	Participation in work force and association with different variables.	93
4.1	Participation in work force as per region.	93
4.2	Participation in work force as per caste.	93
4.3	Participation in work force as per income.	94
4.4	Participation in work force as per level	94

4.5.	Participation in work force as per educational level.	95
5	Occupational distribution of respondents as per region.	98
6	Occupational distribution of all females of selected households as per region.	100
7.	Number of working days and association with different variables.	102
7.1.	Number of working days as per region.	102
7.2	Number of working days as per status of worker.	102
7.3	Number of working days as per caste.	102
7.4	Number of working days as per income.	103
7.5	Number of working days as per land holding	103
7.6	Number of working days as per level of agricultural mechanization.	103
8.	Impact of agricultural technology on status of women and association with different variables.	108
8.1	Impact of agricultural technology on status of women as per region.	108
8.2	Impact of agricultural technology on status of women as per caste.	108
8.3	Impact of agricultural technology on status of women as per status of worker.	109
8.4	Impact of agricultural technology on status of women as per level of agricultural mechanization.	109
8.5	Impact of agricultural technology on status of women as per income level.	109
9	Level of improved household technology and relation with different variables.	115
9.1	Level of improved household technology as per region.	115

9.2	Level of improved household technology as per income.	116
9.3	Level of improved household technology as per socio-economic-status.	116
9.4	Level of improved household technology as per highest education in the family.	117
9.5	Level of improved household technology as per education of the respondent.	117
9.6	Level of improved household technology as per main occupation of family.	116
9.7	Level of improved household technology as per caste.	118
10	Average time devoted to different household activities per day in different regions.	123
11.	Time devoted to food preparation as per caste.	125
12.	Time devoted to cleanliness of the home as per caste.	127
13.	Role of women in animal care in different regions.	129
14.	Role of women in animal care as per level of income	130
15.	Time devoted to flour grinding in different regions.	133
16.	Leisure time of the respondent and relation with different variables.	135
16.1	Leisure time of the respondent as per region.	135
16.2	Leisure time of the respondent as per level of home technology.	136
16.3	Leisure-time of the respondent as per income level.	136
16.4	Leisure time of the respondent as per main occupation of family.	137
16.5	Leisure time of the respondent as per age.	137
16.6	Leisure-time of the respondent as per caste.	138

16.7	Leisure time of the respondent and outside working of women.	138
17	Knowledge about improved household technology in different regions.	142
18.	Relation of different variables with knowledge about improved household technology.	143
19.	Knowledge about different improved household technology.	145
20.	Role of women in farm decisions in different regions.	150
21.	Role of women in decisions related to home management.	153
22.	Role of women in decisions related to social obligations.	155
