

Some Inferences in a Component of
Variance Model Using Preliminary Tests
of Significance

A Thesis Submitted
to the University of Lucknow
for the
Degree of Doctor of Philosophy
in Statistics

By
Rajendra Kumar Srivastava

M. Sc.

Department of Statistics
Faculty of Science
Lucknow University
Lucknow (India)

1972

CERTIFICATE

This is to certify that Sri Rajendra Kumar Srivastava has worked under my supervision. His thesis on 'Some Inferences in a Component of Variance Model using Preliminary Tests of Significance' is a genuine and original work of his own.

S.R.Srivastava
Reader,
Department of Statistics,
Lucknow University,
Lucknow

A C K N O W L E D G E M E N T

I am extremely grateful to Dr. S.R.Srivastava, my research supervisor for the invaluable advice and encouragement which I have received throughout the period of my research leading to the present thesis. I also owe a great debt of gratitude to Prof. A.R.Roy, Head, Department of Statistics, Lucknow University, Lucknow for the generous help and kindness which he has always shown to me.

I am indebted to the University of Lucknow for awarding me a fellowship and the University Grants Commission, New Delhi for a Junior Research Fellowship through which I was able to continue the research work.

I would also like to thank my teachers and friends in the department for the discussions and help rendered during the preparation of the thesis.

Rajendra Kumar Srivastava

C O N T E N T S

	Page
Chapter 1	
Introduction	1-8
Chapter 2	
Review of Literature And Object of Present Study	9-15
Chapter 3	
Mathematical Description of An Incompletely specified Model	16-22
Chapter 4	
Derivation of Formulae for Power	23-47
Chapter 5	
Approximate Formulae for Power Components for large degrees of freedom	48-54
Chapter 6	
Some Mathematical Results	55-72
Chapter 7	
Discussion on Size and Power	73-85
Chapter 8	
Expected Value and Mean Square error of Variance estimate	86-115
Chapter 9	
Discussion of Bias, Mean Square error and Relative Efficiency	116-120

	Page
Appendix A	
Tables for size and power	121-140
Appendix A ₁	
Tables for power gain	141-144
Appendix B	
Tables for Bias, Mean Square error and Relative Efficiency	145-150
Bibliography	151-156
