C E R T I F I C A T E

This is to certify that Shri Raj Kumar Upadhyay has worked on the dissertation entitled: "Patterns of Adjustment and Problems and Prospects of Rehabilitation of Long Stay Hospitalized Schizophrenic Patients", under my guidance and supervision. He has conducted this study methodically and scientifically. This is his original work and conforms to the norms laid down for a Ph.D. Dissertation.

Professor and Head,
Department of Social Work and
Dean, Faculty of Social Sciences,
Kashi Vidyapith, Varanasi-221002.

ACKNOWLEDGEMENTS

I feel short of words to express my profound sense of gratitude appropriately to my teacher and guide, Dr. Chandra Prakash Goyal (Professor and Head, Department of Social Work, Bashi Vidyapeeth, Varanasi), an indefatigable savant; it is he who motivated and constantly persuaded me to complete the present work and it is he who helped me to surmount all the stumbling blocks in the task, and under his guidance this work attained the present shape. Indeed, I am so deeply indebted to him that words fail to express my real appreciation and gratitude to him for his kind and generous help and guidance. Not to exaggerate, this work would have remained incomplete but for his selfless interest in me and my cause.

I am thankful to Dr. Bhaskaran, B., the the Medical Superintendent of Central Institute of Psychiatry (Ex-Hospital for Mental Diseases), Ranchi, for getting and extending me all the facilities to conduct this research work. I am really thankful to him for his expert guidance also in the initial stages of the present work.

I am thankful to Dr. A.S. Singh, Professor and Head, and Dr. M. Hassan, Reader, Department of Psychology, Ranchi

University, Ranchi, for their help at the various stages of the present work.

I owe thanks to Dr. R.G. Sharma, Assistant Professor of Psychology, and Shri D. Mishra, Statistician, Central Institute of Psychiatry, Ranchi, for help in initiation of the present work, ^{and} in statistical calculations, respectively.

I am equally thankful to Shri A.N. Verma, Senior Psychiatric Social Worker, and Shri R.N. Jha, Senior Librarian, Central Institute of Psychiatry, Ranchi, for their cooperation and help in completion of the present work.

I owe heartfelt thanks to my wife, A.P. Upadhyay, who constantly encouraged me to complete this work and extended all cooperation even at the cost of her health. I have every appreciation for my nephew, D.C. Shukla, who did all the odd jobs in connection with my present work. My sincere thanks to my students who helped me whenever I required their cooperation.

I am thankful to the nursing staff and ward attendants, Central Institute of Psychiatry, Ranchi, for their cooperation in collection of data.

I am thankful to Shri S.D.C. - a chronic hospitalised schizophrenic patient - who typed the draft report of this study.

- RAJ KUMAR UPADHYAY.
