This is to certify that the thesis entitled -

"DEVELOPMENT OF AN UNIFIED SCHEME OF
COMMON SUBDIVISIONS IN GENERAL CLASSIFICATION
SYSTEMS"

presented by Shri A.Y. ASUNDI for the award of the degree of Doctor of Philosophy in Library science is based on the results of the experiments carried out by him under my guidance. The thesis represents his original work and it has not been the basis for any thesis previously submitted for the award of any degree or diploma.

Date: 26th April 1982

(Dr. S.R. GUNJAL)
Reader and Head
Department of Studies in Library Science
Gulbarga University
GULBARGA - 535 105

ACKNOWLEDGEMENT

I intend to offer my acknowledgements to begin with to two Great Minds in Library Classification who have been so acclaimed world over. Their work has provided enough opportunities to number of research workers to extend their thought. I spell their names with reverence as Dr. Melvil Dewey and Dr. S.R. Ranganathan to whom the whole profession owes too much and I am no exception.

It is indeed my privilege to get associated with Dr. S.R. Gunjal, Reader and Head, Department of Studies in Library Science, Gulbarga University, Gulbarga as my Guide. From the very beginning even as I conceived this topic he evinced keen interest in my work and bestowed to me useful guidelines, suggestions at every meeting I had with him. I need hardly put up my utterances here, the completion of this work in time is due to his sustained help and persistent guidance.

I am grateful for the enlightenment received by me from a few experts in the field who provided an occasion during their busy schedule to discuss some useful points with them personally. Once again I extend to them my sincere thanks.

I am privileged to use the resources of DRIS and Bangalore University Libraries during my work. The Librarians of these two institutions were very kind to me whenever I approached for their help. Wholeheartedly I acknowledge their services and help.

I owe my sincere indebtedness to the Senior Members of staff of Indian Institute of Management Library, Bangalore and my co-workers whose cooperation and help will ever remain in my memory.

More often than not, my wife Ratna, kids Vijju, Sharayu and Renu have been deprived of their rightful entertainment during the course of this work. In turn their intermittent company had provided ample time to relax and then continue my work. I share all my work and pleasure with them.

Last but not least I am grateful to my numerous friends and well-wishers who either directly or indirectly helped me in completing this work.

A.Y. ASUDE
